

## Carbon Moves! Data Recording Sheet

| Round | Starting Reservoir | Time in Reservoir | Process causing change in form of carbon (if any) | Ending Reservoir |
|-------|--------------------|-------------------|---------------------------------------------------|------------------|
| Ex.   | Atmosphere         | 65 years          | Photosynthesis                                    | Biosphere        |
| 1     |                    |                   |                                                   |                  |
| 2     |                    |                   |                                                   |                  |
| 3     |                    |                   |                                                   |                  |
| 4     |                    |                   |                                                   |                  |
| 5     |                    |                   |                                                   |                  |
| 6     |                    |                   |                                                   |                  |
| 7     |                    |                   |                                                   |                  |
| 8     |                    |                   |                                                   |                  |
| 9     |                    |                   |                                                   |                  |
| 10    |                    |                   |                                                   |                  |
| 11    |                    |                   |                                                   |                  |
| 12    |                    |                   |                                                   |                  |
| 13    |                    |                   |                                                   |                  |
| 14    |                    |                   |                                                   |                  |
| 15    |                    |                   |                                                   |                  |
| 16    |                    |                   |                                                   |                  |
| 17    |                    |                   |                                                   |                  |
| 18    |                    |                   |                                                   |                  |
| 19    |                    |                   |                                                   |                  |
| 20    |                    |                   |                                                   |                  |
| 21    |                    |                   |                                                   |                  |
| 22    |                    |                   |                                                   |                  |
| 23    |                    |                   |                                                   |                  |
