Preface

Dear Students,

I am so excited to present this textbook “Fly with Arabic”. This is the best title I thought of because I think that we can reach high levels of proficiency in Arabic this year.

The book contains eight units and the materials are designed to cover approximately 120 classes. Each unit gives attention to all skills: listening, reading, writing, speaking and culture. They use the basic building blocks of vocabulary and grammar in the format of drills and activities.

The writing activities are related to the speaking and listening activities, making them more connected and easy to understand. Most of the drills are open answer format to allow more creativity in producing different skills. This provides opportunities to go further with the language.

Vocabulary is an important element of building proficiency. It would be great if you can prepare the vocabulary at the beginning of each unit before class. This will allow us to have more time on using these vocabularies in the content, maximizing the time of learning in the class.

Grammar is integrated naturally in the speaking and conversations rather focusing on the rules and structures. This approach will help us to learn the language itself and become more fluent in conversation.

Each chapter has a summary of culture related to the unit. This will help you to integrate language with the cultural context.

At the end of each unit there is a self- assessment checklist to help you monitor and measure your progress during the unit. It will be great if you can go to this page often to evaluate your progress.

I hope this textbook will help make your experience with learning Arabic fun, challenging, and joyful.

Sincerely,

Belal Joundeya
