

Curriculum Vitae Of Dr Stranger KGAMPHE

Sir,

I have reached a level of maturity and understanding professionally. During my short life, I have acquired sufficient qualifications and skills in order to add more value elsewhere.

I have travelled the world and was invited as the visiting Professor at the University of Penn. in USA, as a visiting Research Scientist at the University of Chicago and as a research Scientist at the University of London Ontario in Canada.

I won the award of the best young scientist presenter at the Anatomical Society of South Africa in 1986, held at Sun City, South Africa.

I develop young leaders and was invited to motivate PhD students at the South Africa Netherlands Professional Development(SANPAD) during my PhD studies.

It is Not the qualification that produce the results, but the competencies I have that will make a difference, should I be given a chance.

Thanking you in anticipation.

Yours Sincerely,

Stranger Jacob KGAMPHE Ph.D (Asi Fellow)
