

Project Summary

Idea/Introduction

A project summary will outline the idea and the purpose of the app as well as the work that went into the production of the app.

Learning Outcome

Making a project summary will help participants reflect on weeks of progress made and show off their work to others.

Time

10-15 min

Definition

A project summary defines the project and lays out the goals and accomplishments that mark the project journey. They can serve as a record of process for a development project as well.

Activity

At the end of the App Authors program, participants will have a one-sheet project summary where they can tell the world about what they made in App Authors. This project summary can include their own skills as developers as well as a bio including all the new skills they have learned.
