

Declining Bee Population Project Rubric

	10	7	4	1	Score
Design	Creative and thoughtful use of materials used. Materials used were appropriate for the chosen project and it is apparent that a significant amount of time was spent designing the project.	Different materials were used and the team was somewhat creative in using the chosen materials. It is apparent that time was spent designing the project.	The team was somewhat creative in using the chosen materials and it was obvious that the team did not spend much time planning and designing the project.	Project uses only one or two main materials, in a noncreative way, and the project is not successful in meeting the project challenge.	
Creativity	The final project was original, demonstrated the team's vision, and was created using multiple student ideas.	Project design was original and demonstrated the team's vision, but it did not encompass multiple student ideas.	Project design was original, but lacking creativity. More time could have been put forth in executing a project that showcased the team's vision.	Design lacks creativity and did not showcase the team's vision for the project.	
Teamwork	All team members worked well together and ideas from each team member was included, respected, and apparent in the final project. All team members participated throughout the entire design process.	All team members worked well together and ideas from each team member was included, respected, and apparent; however, it appeared that not all team members were always involved in the project.	Some team members were not working on the project or not contributing equally. Overall project shows a lack of teamwork.	It is apparent that only one or two members were a part of the preparation and execution of the project.	
Presentation	Final project presentation was organized, engaging, and directly related to the final project. All team members participated in the presentation.	Final project presentation was organized and related to the final project, but it was not very engaging or appealing for the audience.	A final project presentation was given, but was unorganized and lacked focus. It is apparent that more effort was needed.	The final presentation was unorganized. Not all team members participated.	
Resources	Students planned and designed their project based off of knowledge and valuable resources related to this project. All resources used were cited appropriately.	Students planned and designed their project based off of knowledge and reputable resources related to the project. 1-2 errors were present in citations.	The project design was not inspired by prerequisite knowledge or resources related to the topic, but the resources used were cited correctly. More than 2 errors were present in the citations.	The project used limited resources or no citations were provided.
