## Pre-Lab Upload Test

1. What is your major?
2. What grade do you hope to receive in this course?
3. List three behaviors you plan to engage in to achieve your goal in #2. (In other words, what three things do you think are most important for you to do to earn the grade you're after?)
4. As you learned in your orientation, this course utilizes open educational resources (OER) for its textbook and lab manual. Were you aware that this course utilizes OER (free online textbook and lab manual) before you enrolled? Was this a factor in your choosing to take this particular course? (I'm trying to gauge how important it is to students that instructors adopt OER books instead of more costly textbooks by big-name publishers).
