

# Equivalent Fractions Poster and SeeSaw Activities

<b>Expectations</b>	<b>Self Check</b>	<b>Teacher Check</b>
My poster has a title.		
I drew two pictures and divided them to model equivalent fractions.		
I labeled each picture with the appropriate fraction.		
I took a picture of my poster with the Chromebook's camera.		
The picture of my poster is added to the assignment on SeeSaw.		
I recorded myself on SeeSaw explaining how the two fractions on my poster are equivalent.		
I completed the second activity on SeeSaw following the directions given.
